Now in its seventh edition, this renowned book is a standard reference for the mineral processing industry. Dealing with each of the major processing techniques and covering the latest technical developments in the processing of increasingly complex refractory ores, new equipment and process routes, this new edition has been prepared by the prestigious J K Minerals Research Centre of Australia, which contributes its world-class expertise and ensures that this will continue to be the book of choice for professionals and students in this field. This latest edition highlights the developments and the challenges facing the mineral processor, particularly with regard to the environmental problems posed in improving the efficiency of the existing processes and also in dealing with the waste created.

"Mineral Processing Technology will continue to be a key reference book for mineral engineering professionals and a recommended textbook for mineral processing students."
